

INTRODUCING THE WORLD'S FLATEST AND SLIMMEST BRANDABLE USB FLASH MEMORY CARD

DOTEL IT Consultants is pleased to introduce to you, one of our newest products; the SLIMDATA USB Flash Memory Card, which is the world's slimmest and sleekest USB device.

It could be loaded with new interesting features, such as antivirus software (which could be locked on the drive so that it is always protected and cannot be deleted by mistake – optional feature) and data encryption (Password protection) for privacy of information.

The SLIMDATA USB serves as your regular storage device and it comes in varying capacities - **one, two, four or eight Gigabytes**. The design makes it fit nicely into your **wallet**, like your ATM card, so that you have your flash memory on you wherever you go. You can also use the SLIMDATA USB to increase the RAM of your computer, thereby speeding up your PC.

The SLIMDATA USB is very durable (no movable units when storing or retrieving data), thus making it the ideal information storage/carrying device. It is also produced in partnership with our reliable partners based in the United States of America.

At your request, we can install strong and up-to-date anti-virus software on the SLIMDATA USB to prevent device from picking up worms and viruses as is often the case with most flash drives of today.

We also, most importantly, **brand** the SLIMDATA USB for various organisations. The branded SLIMDATA USB can be used as **corporate gift items** so that everywhere people go; they carry your brand name and information about the goods and/or services you provide along with them. They could also be used as **political branded gifts** with pre-saved

read-only (cannot be deleted) document or video of the politician passing a campaign message.

A recent survey was done at University of Lagos and it was discovered that a person normally open his or her wallet at least 5 times a day. This way, your product can be marketed everywhere, anytime.

Attached to this mail and listed below are some branding works done for some respected clients nationwide with the SLIMDATA USB drive.

DOTEL is often regarded as a company that cares as much about our projects as the customers themselves. We strive to be “your partner in excellence”. Please let us know if you have any questions or concerns regarding this product. We will be willing to attend any meeting you may wish to convene for the purpose of discussing our submission and promise to keep on providing you with the best of our products/services at all times as the responsibility of serving you is a privilege we would hold dear.

We look forward to hearing positively from you soon.
